

What is the Problem?

I can't get my horse to do (A job)

Two ways to solve the problem: 1 – Traditional way, or 2 – Alternative way.

1) **How** can I **make** my horse do the job? 2) **How** can I **help** my horse do the job?

*Slave Mentality

*Partnership Mentality

How can I make him to the job?

Focus on

Why does he not want to do the job?

Focus on

1) **Foundation of Maneuvers**

2) **Direction and Life**

1) **Willing Submission**

2) **Good Communication**

3) **Driving Factors**

How can I move the horse's head and neck, shoulders, and hindquarters in the direction I want, with the speed that I want in order to accomplish the job?

Why does the horse not want to do the job and what can I do differently to help him want to do the job?

Focused on **Job Completion**

Focused on **True Unity (Perfection)**

Run the risk of **unwilling** submission which leads to.....

How can I help him do the job?

Once the horse has **willingly** submitted his will and we are operating with **good communication**....

1) **Lack of communication**

2) **Self-preservation**

3) **Disobedience**

Then we are in a position to **teach** him to do the job. Then we work on building a

Guaranteed Resistance

Level of Resistance is determined by

1) **Solid** Foundation of Maneuvers

2) A **balanced** direction to life ratio

1) Intensity of Job

2) Energy level of horse

3) Patience of person

Remember the three stages of training a horse:

1) Setting a foundation

2) Using jobs to build the foundation

3) Using foundation to do a job

***Fewer Problems and No Resistance**

because the horse wants to do the job and understands how to do it.
